ON TIME DELIVERY

3,335

Suppliers delivered on time 64.13% of the time — ▲ up vs last year; target is 95%.

AVG LEAD TIME

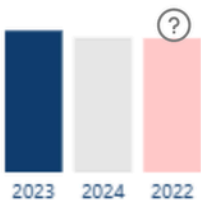

36 days

Ranging from 0 to 90 days. Lead times are extended — review slow categories.

AVG DAY LATE

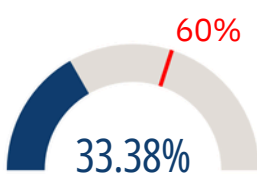

16 days

Late deliveries overdue — each day late increases downstream operational cost.

TIER 1 SPEND

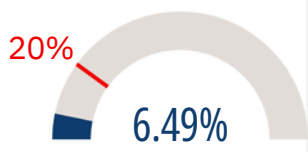

326.90M

Consider consolidating spend toward strategic partners.

HIGH RISK SPEND

63.52M

Spend with high-risk suppliers — within tolerance but requires active monitoring.

SINGLE SOURCE

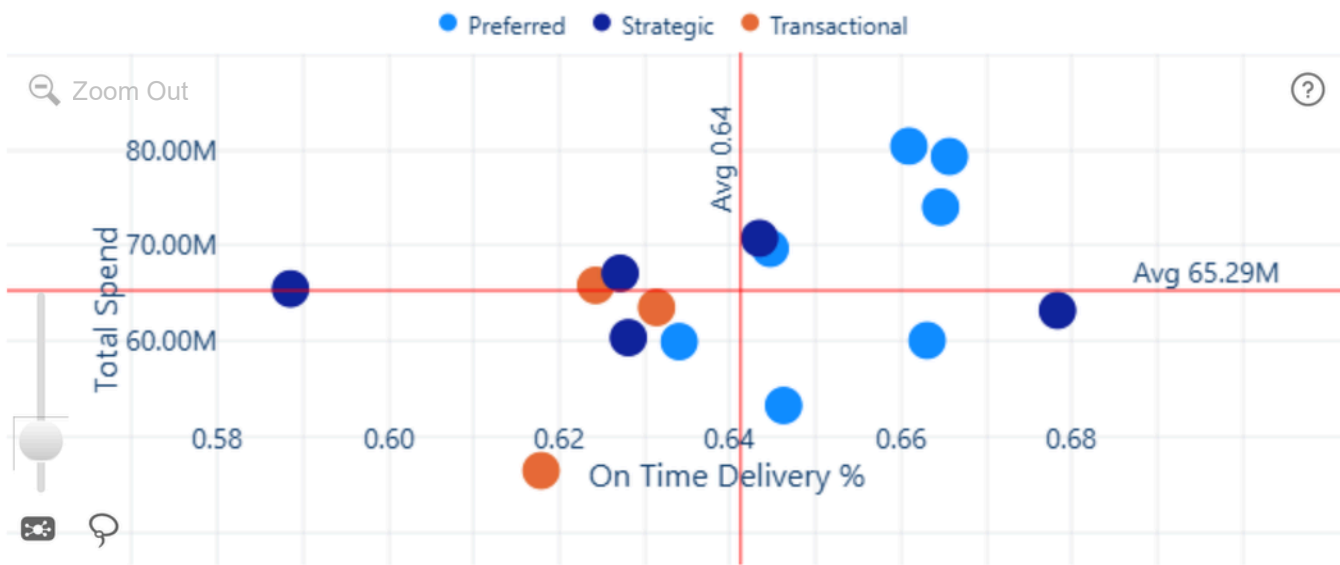

122.00M

Monitor for any new sole-source contracts entering the pipeline.

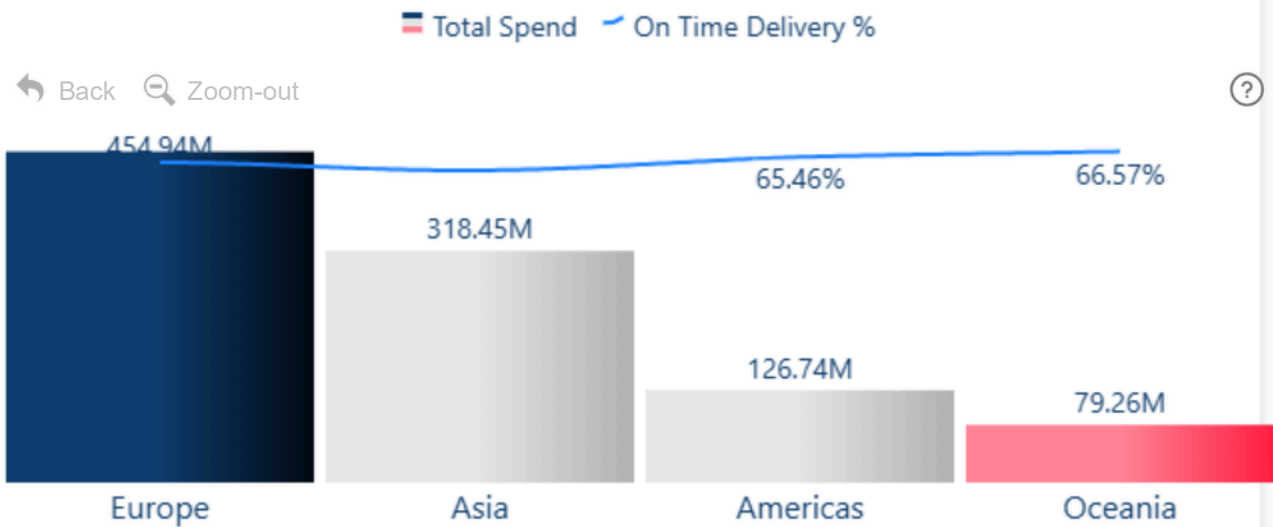

Spend vs on-time delivery by supplier

Does higher spend with a supplier guarantee better delivery, or are we paying more for poor performance?

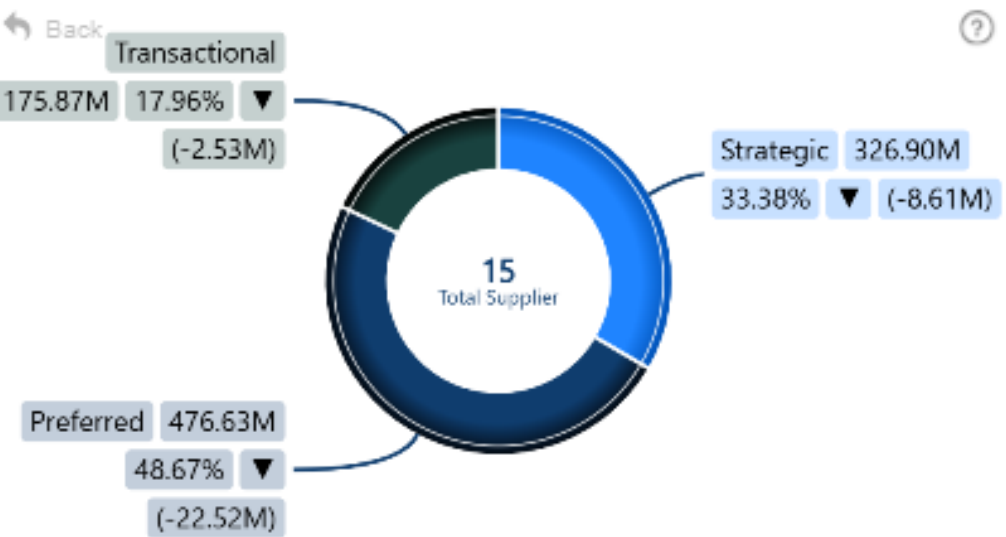

Spend and delivery performance by supplier region → country

Which regions concentrate both our spend and our delivery failures, and does drilling to country level

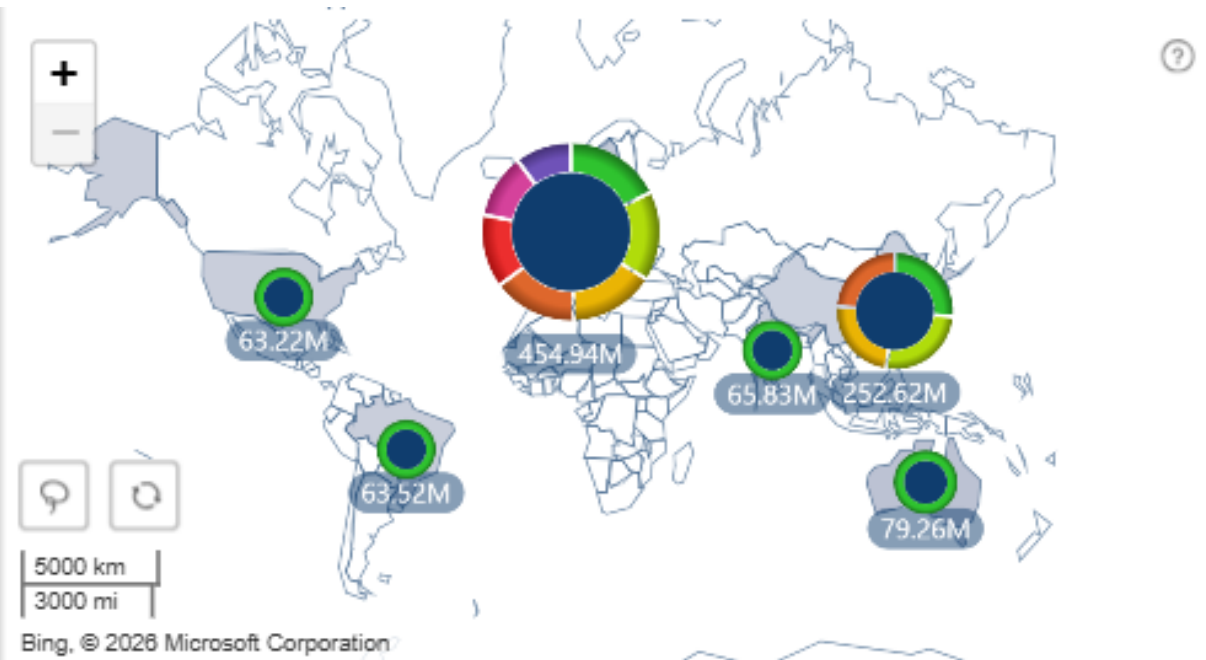

Spend concentration by Supplier Tier → PO Status

What share of our total spend flows through Tier 1, Tier 2, Tier 3

Global supplier spend and risk concentration

Where in the world is our supplier base concentrated?

Supplier scorecard — full performance matrix

For every active supplier, how do spend, delivery, lead time, risk, budget variance, ESG commitment, and preferred status align

Supplier Name	Tier	Risk	Total Spend	Budget Variance %	PO Count	Avg TimeAvg day Leadlate	On Time Delivery %	Avg ESG Score	Preference
Apex Industrial Supplies	Strategic	Low	60,373,336.82	2.83%	320	36 days15 days	62.81%	75.20	Preferred
